Looking for a cost-effective solution for your small business' needs? Look no further than AVERIWARE we provide lower cost of ownership with Software as a Service (SAAS) model. You will save cost with no hardware investments required and with no additional IT staff necessary. What's more, the 100 percent Web-based solution means no installation or software maintenance required. Get more than what you ask for with AVERIWARE.

AVERIWARE

The Anytime, Anywhere Business Solution

It's Innovative

Till now, connecting with your business' critical information had to happen from one place - your office. Averaware allows business owners and authorized personnel to access information from anywhere, at any time! Your only requirement is access to the Internet. With Averaware, you can greatly increase the flexibility of your organization. As a small or mid-sized business, you don't have deep pockets for major technology investments. All you need is an affordable, easy-to-use, and quickly implemented solution. You need Averaware. It's an integrated business system to help you automate your relationship with businesses and run your business better. With Averaware, you'll experience dramatic cost savings, increased profitability, and enhanced partner and customer satisfaction.

It's The Power to Connect

Our suite of integrated business applications seamlessly connects the business processes within your organization, enabling your business to operate more effectively and efficiently. Averaware combines everything successful businesses need -from managing sales opportunities and customer relationships, through order entry and processing, to Internet sales and complete accounting.

It's Integrated

Averaware is totally integrated, with all applications - Accounting and Financial Management, eCommerce, Supply Chain Management (SCM), Customer Relationship Management (CRM), Sales Force Automation (SFA), and Human Resources - built on a single database. So, if you change the price of an item, that change is reflected instantly in both the sales order system and the e-commerce front end. No other business management system offers this kind of integrated, comprehensive functionality. Information flows smoothly throughout your business.

It's Cost Effective

Averaware can be delivered in three ways:

Application Services Provider (ASP) Model:

This model allows a lower up-front investment, faster implementation, and reduced ongoing management costs. In short, it delivers unbeatable ROI.

Software Product Model:

This model allows the business to purchase Averaware and install it on their existing systems. They can run Averaware either as an Internet or intranet application.

Software as a Service (SAAS)

This model allows the business to subscribe to Averware, no installation is required, and they can simply access Averware through a browser using a user id and password. This will allow the business to reduce the initial capital outlay of a software and hardware purchase.

And because Averware is completely Web-based, it's intuitively easy to use, and effortless to learn, reducing training costs. It's simple and powerful, but won't take a big bite out of your budget.

It's Everything You Need to be Successful

Better Insight into Business

With our world-class accounting and financial management functionality, you'll have real-time data from any or all of your company's divisions or locations - all the information you need to better run your business. And no matter how far-flung or complex your business, our integrated. Web-based system enables you to run it as a single enterprise, accessible from anywhere.

Automated Inventory and Supply Chain Management

With Averware, you can automate your purchasing and inventory management to save on manual efforts, improve accuracy, and control costs. With greater insight into the supply chain and streamlined processes to help you manage it, you'll anticipate problems and take steps to avoid situations such as stock-outs that negatively impact customer loyalty.

Integrated eCommerce

Complete with integrated storefront, shopping basket and credit card processing, our e-Commerce application is a powerful tool to help grow your business while streamlining order processing. Your customers can self-order and self-care - looking up an order status, past invoices, past orders and other information.

Big Business Value for Small to Mid-Sized Companies

- Robust Business functionality increases acceptance by distributors
- Ideal for businesses needing broader functionality than QuickBooks or Excel can provide

Central database of distribution channel and inventory information for improved decision-making
Faster, easier access to consolidated, near real-time performance data provides a single point of management
Integrated inventory, financial, customer, and order information

Automated and integrated business processes, eliminates manual processing and reduces administrative overhead, improves accuracy of order, inventory, and financial data, reduces inventory shrinkage
